You have upgraded to the maximum \$100,000. Now, every						55	Weeks
you withdraw \$160,000 start a new contract and pocket \$60,000. That's 60% PA							

The spreadsheet presumes an initial one time purchase of a \$1,000 education package 70% of which goes into a trading pool. When the profits from the traded portion reaches the "target" the contract is upgraded to the next package. The target profit is 125% of the initial package purchased.

This covers the withdrawal fee and provides the funds to upgrade to the next level.

Once you have hit the top level you can roll it over every 10-12 months for another \$60,000 in your pocket.

The whole process is dramatically accelerated if you also participate in the referral program.

Note: You are purchasing a contract.

The contract is considered fulfilled when the initial purchase price is doubled.
